PROFESSIONAL SUMMARY

Software engineer specializing in payments, with experience enhancing payment engines and automating critical processes. My background spans digital payments and capital markets trade settlement. I currently design and implement AI-powered solutions and agent architectures to automate operational workflows and reduce manual effort.

PROFESSIONAL EXPERIENCE

Belong / AI Backend Payments Engineer
| Jan. 2026 - Present

Belong is a U.S.-based proptech startup offering an end-to-end platform for homeowners and renters, combining rental management, financial services, and AI-powered technology. I own the maintenance and continued evolution of its payment engine. I led the migration of payment processing from Dwolla to J.P. Morgan and developed an AI agent that automates payment requests, reducing the team's manual workload by 70%.

Banco Hipotecario / .NET Developer
| Jan. 2024 - Jan. 2026

Led and delivered end-to-end automation of cash settlement for capital markets securities trades. Also developed automation tools and data pipelines using .NET Core and Python.

QServices / .NET Developer
| Oct. 2022 - Dec. 2024

Developed and maintained DirecTV's internal collections management system for South America using .NET Core, Oracle, and Vue.js. Also modernized legacy components to improve overall system reliability and performance.

EDUCATION

National Technological University (UTN)
Information Systems Engineering | 2020 - 2023
.NET Development Academy | 2022

University of CEMA (UCEMA)
Python Applied to Finance | 2025

Torcuato Di Tella University (UTDT)
Leading CX Transformation | 2025

TECHNICAL SKILLS

Languages: .NET, Python, Java, SQL
Databases: SQL Server, Oracle, Sybase
AI: LangGraph, agent development and orchestration, LLM integration, Claude Code, Codex

ADDITIONAL INFORMATION

Native Spanish speaker with upper-intermediate English proficiency (B2+). Strong communication and technical documentation skills. Keen interest in payments innovation, applied AI, and process automation.
